## elastomeric multi-purpose formpieces

For anchor-free, non-levelling machine isolation of all kinds.

Elastomeric multi-purpose formpieces are highly elastic, featuring excellent isolation properties towards horizontal thrust, and are ideally suited for

- aggregates
- heating - ventilation - air-conditioning >>> HVAC
- pumps
- compressors
- hydraulic tanks
- table-top lathes
- table-top wood turning machines
- table-top drills
- washing machines & dryers
- vibratory grinding machines
- plotters and colour printers up to size DIN A 0
- xerox machines

Elastomeric multi-purpose formpieces are square-shaped and sport crosspieces on two sides. A riffled top and a structured bottom ensure enhanced non-slip properties.

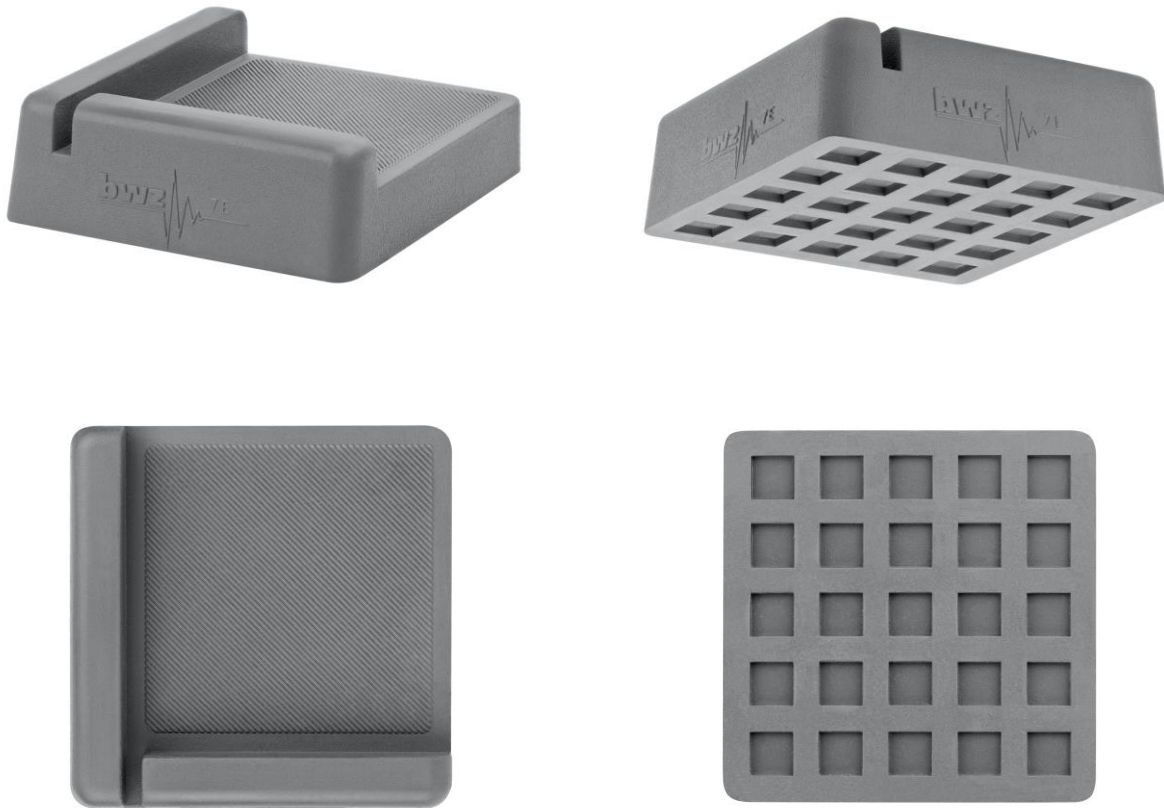

Removing of one crosspiece allows for support underneath elongated machines and devices.

The material basis is nitrile rubber (NBR) with 70° shore (A).

NBR is persistent towards fuels and mineral oils.

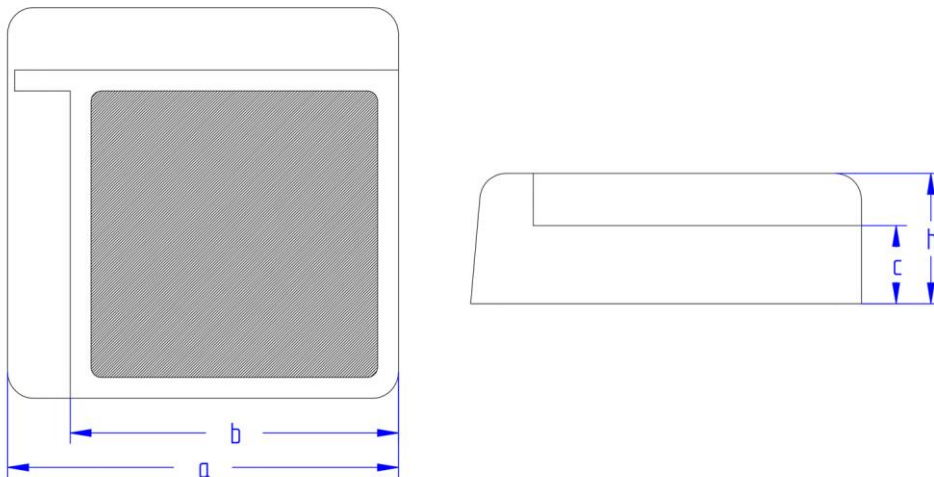

## elastomeric multi-purpose formpieces 7 E

measurement 75 x 75 mm

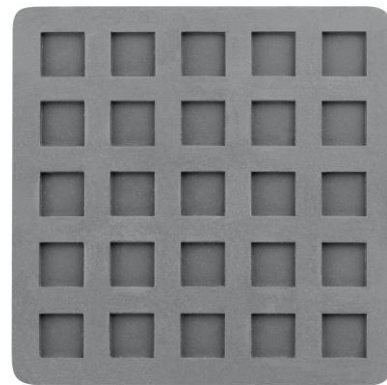

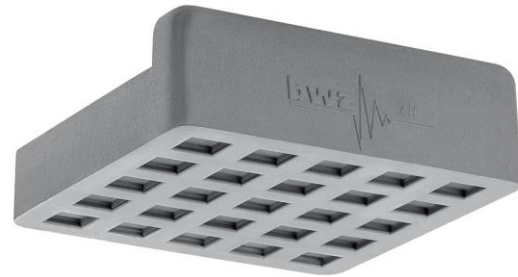

version E: with length- and crosswise crosspiece ( 2 crosspieces). 1 crosspiece can be removed ( optional ).
